Technical Business Analyst who delivered a production SaaS platform to 6 European B2B clients. Combines software engineering depth with structured BA methodology in SaaS, AI/LLM, and fitness domains.

SKILLS

Business Analysis: Requirements Engineering (RTM, NFRs), BPMN (As-Is/To-Be), User Stories & Acceptance Criteria, Backlog Prioritization, Stakeholder Elicitation, UAT, Gap Analysis, UML

Systems & Data: API Contract Design, Data Modeling, Bounded-Context Analysis, ERDs, Architectural Trade-off Analysis, SQL, AI-Assisted Analysis & Documentation, LLM/RAG Pipelines, Prompt Engineering

Tools: Workflow & Agile (Jira, Camunda Modeler, Draw.io, Confluence), Technical (Postman, Supabase)

WORK EXPERIENCE

Technical Business Analyst & Software Engineer, Wavess (Remote) 12/2025 – 05/2026 | Berlin, Germany

- Led requirements elicitation for a 3-service AI-native SaaS platform, authoring 40+ requirements and an RTM that aligned a 4-person dev team with business goals.
- Conducted competitive/market analysis and modeled actor-based use cases (8 actors) to define product positioning against six identified market gaps.
- Evaluated Monolith vs. Microservices trade-offs, defining a Federated SOA and multi-tenant data model (PostgreSQL RLS) balancing cost with GDPR compliance.
- Built a weighted Jira prioritization matrix (Value 40%, Urgency 25%, Risk 20%, Architectural Dependency 15%), delivering MVP to 6 European clients within a 6-month Lean Scrum cycle.
- Translated AI capabilities and third-party integrations (LLM providers, Apify, Tavily) into user stories, acceptance criteria, KPI frameworks, and API contracts.

Functional Analyst & AI Engineer Intern, AYCORN Technologies 06/2025 – 08/2025 | Tunis, Tunisia

- Mapped end-to-end workflows for an AI interview platform across 4 stages, wrote functional specs, and prototyped real-time voice sessions.

Functional Analyst & Developer, Stade Nabeulien Rugby Club 06/2025 – 09/2025 | Nabeul, Tunisia

- Elicited requirements from non-technical staff, delivering a scheduling, attendance, and CSV-reporting platform that cut manual work by ~2-3 hours/week.

Web Developer Intern, Millesima Technologies 02/2023 – 05/2023 | Tunis, Tunisia

- Gathered requirements and documented RESTful API specs for a VOD platform within a 2-week Agile cycle.

PROJECTS

HypertroQ, End-to-End Business Analysis Lifecycle (Personal Project) 07/2026 – Present

- Authored a complete 12-artifact BA specification (Charter -> UAT plan) for a science-based workout-tracking MVP: 92 functional + 12 non-functional requirements with a full RTM, 14 Gherkin user stories, 4 BPMN 2.0 models (36 business rules), 8 ADRs, and a bounded-context data model with 5 API contracts.
- Traced every requirement end-to-end from business objective -> process model -> user story -> data model -> architecture decision -> UAT test case, producing a specification a dev team could build from without re-deriving scope.

EDUCATION

Software Engineering (Engineer's Degree - Equivalent to Master's) 2023 – 2026 | Nabeul, Tunisia
IT Business School

Bachelor's degree in Information Technology 2020 – 2023 | Nabeul, Tunisia
Higher Institute of Technological Studies of Nabeul
